Sedgwick's Report.

WASHINGTON, October 3d.—Secretary Bayard is expected in Washington the latter part of this week. When he returns he will find awaiting him the written report of Envoy Sedgwick on the Cutting case. It is made up chiefly of extracts from the Mexican statutes and records. It will be useful to Mr. Bayard, not only in the prosecution of further negotiations in regard to the claim of extra-territorial jurisdiction as applied by Mexico to American citizens, but in the preparation of the review of the Cutting episode, which Mr. Bayard will make for the use of President Clevcland in connection with his annual message. The Capital says that Secretary Bayard has not receded from his position in the Cutting case, as has been represented, and Minister Manning's first business in Mexico will has to resume the pregatations of the country are expected to be dishonesty of which he is accused. It has been discovered recently that forged orders had been presented for vouchers at the City Comptoller's office for rebates due on real estate special assessments. The vouchers thus obtained have been presented to the City Treasurer and paid. These rebates on Chicago assessments amount to \$3,000 per month, and are so irregularly collected by property-owners that upwards of \$100,000 have accumulated in the Treasury. All efforts to find Gallager to-night were fruitless, and, it is believed that the strong suspicions directed toward him have frightened him into function will have for the cutting case, as has been represented, and Minister Manning's first business in Mexico will have to resume the preparation of the country are expected to be

ST. LOUIS AND THE KNIGHTS.

Let us not judge St. Louis too quickly.

The charges made by the advance guard of returning Knights Templar are that the St. Louis people were inhospitable, cold economic habits. They see neither obligathe level of the economic East, though we have approached it, for something of the good old Pioneer era liberality attaches to us as yet, and we are not sure that it is an evil by any means. When we compare our methods with those of the East, we are apt to consider theirs niggardly, when the fact must be that they are up to a fine standard. It is certainly true that Eastern people consider ours extravagant; but if so, they serve our taste. During the recent visitawas the common remark of Eastern guests that they had never heard of or experienced such lavish hospitality as California dispensed. They were very loud and warm in these expressions. What we then thought to be flattery, or the extravagant compliment of the pleased guest, may, after all, have been simple and unexaggerated truth. It may be that to the vision of our Californians at St. Louis the spectacular display was poor, but only by contrast, and that it was in reality up to a very high standard; that to their judgment the enthusiasm of the hosts was cold only by contrast with the exuberant manifestations of concern, and the unparalleled bounteousness with which we dined we are perfectly willing for the Eastern people to write us down extravagant. Three years ago Rev. H. C. Christian was called to the pastorate of the Seventh-street M. E. Church South. He came here from Barnsville, Pike county, Georgia. He is an earnest Christian gentleman, one whose soul is in his work, and during the time he has been here has succeeded in gaining nearly one hundred accessions to his church, and secured a large congregation from among the best and most substantial eitigens of the community. He came here wishy-washy religionists who pray to-day and not to-morrow, but men who work vent of the present paster, there was a disposition on the part of members of the congregation to believe that the Southern Church did not have a place here. Such a feeling does no longer exist. Sectionalism, if it ever did exist here, is a thing of the past, and all feel now that they are laboring solely in the cause of Christ, and in this work are co-operating with all Christian churches. Mr. Christian is an earnest worker—in some respects an evangelist—and as a revivalist he has no superior. Last night he preached the last sermon of his third year. On next Sabboth morning and evening his pulpit will be filled by Bishop Keener, of New Orleans.

Nothing else will liberate you from the prison you are in to-night but becoming a disciple of Christ. One time an eloquent Methodist, at the close of a splendid sermon, asked some one to come forward for the prayers of the church. A man came toward the of the church. A man came toward the altar whom the minister recognized as a thief, a debauche, one with whom respectable people refused to associate, a man steeped in crime. Advice to Mothers.—Mrs. Winslow's SOOTHING SYRUP should always be used when children are cutting teeth. It relieves the little sufferer at once; it produces natural, quiet sleep by relieving the child from pain, and the little cherub awakes as "bright as a button." It is very pleasant to taste. It soothes the child, softens the gums, allays all pain, relieves wind, regulates the bowels, and is the best known remedy for diarrhoza, whether arising from teething or other causes. A 1880 the transfer of the Having been in the employ of the Michigan Stove Company many years, and having examined many Stoves reported to them as not operating properly, I will give you a statement of some of the principal blunders, hoping that it may aid those who deal in downward-draft Cook Stoves in rrecting some of said blunders. Very often the pipe used is smaller than the collar of the stove. This is very common, and is generally caused by purchasers wishing to save the expense of new pipe when buying a large Stove to replace a small one. Agents should remember that in no case do we guarantee the operation of any Stove made by us where the pipe used is not full size of the Working Two or More Stoves in the Same Flue. This is also a very common blunder, and one that Agents can easily discover. They should never guarantee a Stove to give satisfaction where it is proposed to work it in a flue with another Stove, as they have no such guarantee from us.

The Chimney Too Low. We have often found the chimney lower than the adjoining building; the kitchen being one-story, while the balance of the house was two stories or more, causing the wind, in coming over the taller portion, to blow down the chimney, and on two occasions we have found, added to this fault, a large tree overhanging the chimney, thus choking The great trouble with most persons using Wood Ranges and Stoves is that they use too much coal. If they would only try it, they would be astonished to see how little is really uired to do good baking in the "GARLAND" RANGE If the following suggestions were always observed in etting up Stoves, much trouble would be saved First—Be sure that the flue into which you are going to put the Stove has a good draft, and that the chimney is as high as any adjoining building. Second—See that all the openings into the flue, no matter of what kind—whether above or below, in garret or cellar, excepting the one you are going to use-are securely
